

# Capalmages for Capalnstaller

Version 1.0

## DESCRIPTION

The large amount of security patches and new builds has increased over the years. This has raised a constant need to update Windows images, which is a time-consuming task. The constant need for updating the Windows OS Images has become a time-consuming task.

The combination of Capalmages and Capalnstaller puts you in the driving seat when it comes to secure security.

With Capalmages you can skip the monthly security update of your images and let CapaSystems handle that

It is always the latest version of Windows 10 (e.g. 1809) that is kept up to date.

All images are 100% hardware-independent, created in a virtual environment and built in workgroup, thus there are no traces of domain policies or similar settings.

## ADVANTAGES

- Be sure that your Windows Images have all necessary security updates
- Save time and resources on preparing and creating new images
- Download pre-prepared standard images from a website where Capalmages for Capalnstaller are available
- Images are created and thoroughly tested by experienced CapaSystems consultants who know and understand the needs of end-users as well as Capalnstaller administrators.
